

# BDO Indonesia - Secured Cloud Collaboration Transformation

Improving security and compliance is the main focus of the project with BDO Indonesia. EIKON assists BDO Indonesia to implement the endpoint management using Google Workspace Enterprise Edition to secure and protect organization data.

## The challenge

Managing endpoints requires a lot of efforts not only from the IT side, but also can be overwhelming from the user side. Having employees working remotely is a challenge on getting them to be able to access organization data securely. Access to company data is required to be secure while IT needs to ensure to provide the user easy access without any hassle such as connecting via VPN.

## The solution

EIKON assists BDO Indonesia to discover the security needs to provide secure environment for the employees to work within the company network as well as outside the company network while making it easy for the users to access the data they require. EIKON implements and strategize the roll out of the Advanced Endpoint Management for BDO Indonesia using the Google Workspace Enterprise Edition.

## The results

Google Workspace has enabled breakthrough solution for improving security for organization data as well as endpoints while making it easy also end-user to access and collaborate data with others. BDO Indonesia has seen tremendous impact using the Google Workspace Enterprise Edition. BDO Indonesia is able to manage the endpoints securely and they can focus on what really matters to their business.

“ Google consistently invests in their Google Workspace solution and as customer we get the values of it. We can get better software everyday without having to do anything. Security matters to us and Google Workspace is capable to provide what we expect. This brings so much efficiency to our organization. ”

Charthon A. Kurniawan, Head of IT, BDO Indonesia
